SYSTEM
STANDEX®

Direct method of supply

System Standex design, develop and manufacture all exhibition and display systems in house. We supply direct from our factory to our customers.

From our central production facility we manage the process from design to delivery – working closely with our customers to ensure a high quality cost effective product delivered on time

System Standex offer full production services including cutting – drillings – machining – bonding – powder coating – joinery and distribution.

We offer our profiles and jointing systems in a format to match your demands – as components or as a part or complete assembly.

System Standex have been involved in design and manufacture of aluminium frames for more than 50 years.

During this time we have developed systems for many industries and have established markets in

- exhibition and display
- shop fitting and visual merchandising
- museum displays including high security showcases
- machine guards – frames – partitions – enclosures

This brochure illustrates some of products we supply to the display industry. There is much more. Contact our experienced sales team to find out more.

A flexible system

– can be linked and combined in many configurations

Cobra Expo

Classic exhibition construction system with uprights and cross rails to take panels. Modular stand builds and shell scheme system.

▲ Fittings for glass panels

◀ Decorative profiles

Constructed with uprights and cross rails and to take panels with and without graphics – Cobra Expo is a classic and robust construction system. The modular format makes design and build easy – plus a wide range of interchangeable accessories.

Imaginative ideas

- easy to create

Round uprights with 8, 6, or 4 channels

Uprights and cross rails are important basic components of Cobra Expo. Their circular shape produces an attractive design and numerous creative opportunities. Uprights are available in 8, 6 or 4 channel versions which allow you to design stands with a wide variety of angles that creates exciting and distinctive displays.

Range of colours

Cobra Expo is available with a silver-anodised finish or in a range of colours to suit your design. System Standex offers an in house powder coating service using the RAL range of colours.

Quality finish

Cobra Expo cross rails are fitted anywhere on the upright. The robust connectors on the cross rails expand when the Allen key is tightened. The cross rails are available in 50 or 150mm widths.

Room for creativity

You can design and create exciting and eye catching displays with individual design. Curved walls, ceiling and sections – system creating your designs.

Develop your stand

Cobra Expo takes practical details into account. Your exhibition stand can be constantly developed and revised using existing and addition system – and by combining it with other systems from System Standex.

Cobra Expo

Modular sizes

Dimensions are centre to centre of upright.

The module sizes are to modular lengths of 984mm between the centre of uprights. This ensures that there is room for complete modules in a stand which has been measured in full metres. Cross rail lengths are to the module sizes. Panels are cut in modular size -32mm to fit into the system. Read more about panel sizes on page 22. The system can be supplied in other modular sizes according to specification.

Uprights

Uprights available with 8, 6 or 4 channels. Uprights are supplied with an adjustable foot. The uprights can also be produced in specific lengths.

Cross rails

Cross rails are available in widths of 50 or 150mm. They are supplied pre-fitted with joints and connectors in standard module size starting with 1/4 module and up to full diagonal.

50mm cross rail

Pre-fitted with joints and connectors

- 1201-1 1/4 module
- 1201-2 1/2 module
- 1201-3 3/4 module
- 1201-4 1 module
- 1201-7 2 modules
- 1201-8 3 modules
- 1201-9 4 modules
- 1201-10 5 modules
- 1201-6 1/2 modul diagonal
- 1201-5 1 modul diagonal
- 1201-S In specific sizes

Curved 50mm cross rail

Pre-fitted with joints and connectors

- 1202-1 1/4 curve
- 1202-2 1/2 curve
- 1202-3 Diagonal curve
- 1202-S Curves in specific designs

150mm cross rail

Pre-fitted with joints and connectors

- 1200-1 1/4 module
- 1200-2 1/2 module
- 1200-3 3/4 module
- 1200-4 1 module
- 1200-7 2 modules
- 1200-8 3 modules
- 1200-9 4 modules
- 1200-10 5 modules
- 1200-6 1/2 module diagonal
- 1200-5 1 module diagonal
- 1200-S In specific sizes

Technical info

Cutting length of special lengths is 54 mm shorter than the distance between the module lines (27 mm on each side).

The connector holes are drilled exactly as shown.

Display with a fabric banner

Fabric banners are an economical method of presenting large (and small) scale graphics.

The fabric simply requires a hem top and bottom so as to take the cross rails. The banner will be stretched between the cross rail when fitted to the uprights.

The system can be used as a part of the exhibition stand or as a stand alone display. See more details on page 21.

Cobra Expo

**SYSTEM
STANDEX®**

Technical floor

A raised floor can increase the impact of your stand and products. Standex Technical Floor raises the floor 110mm and allows services to be hidden plus you can finish your floor with carpet or laminate as required.

The system is based on, and is part of, the Cobra Expo exhibition stand system. It is easy to assemble – cross rails are fitted with joints that just slide into the uprights - no tools required. Technical floor height allows for cables and services to be hidden. Wheel chair ramps are available as required.

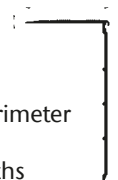

Uprights and cross rails assembled without tools. Panels locate and rest on the frame.

Adjust the up-rights as necessary – lay down the flooring.

Fix the perimeter profile. This profile covers and protects the edge of the floor and can take graphics.
