STANDEX®**

Engageret partner for individuelle løsninger

System Standex' konsulenter og konstruktører engagerer sig i udvikling af individuelle løsninger. Til hver opgave knytter vi en projektleder, som er kontaktperson og styrer hele vejen igennem.

Vi har egen produktion og mere end 40 års erfaring med fabriksindretning.

Vores montører stiller op, tester og sikrer sig at løsningen fungerer både funktionelt og sikkerhedsmæssigt.

Hos System Standex har vi mere end 40 års erfaring med udvikling af fabriksindretning, der forener funktionalitet og sikkerhed i produktionen. Vi har udviklet et utal af forskellige løsninger og har referenceprojekter inden for mange forskellige brancher. Det har givet uvurderlige erfaringer til udvikling af funktionelle systemer til maskinafskærmninger og anden fabriksindretning. Vi har egen konstruktionsafdeling, produktion og montage.

I alle funktioner er medarbejdere, som engagerer sig i din opgave.

- Konsulent og projektleder
- Udvikling og design af individuelle løsninger
- Konstruktion, visualisering og tilbudsgivning
- Produktion af komplette løsninger
- Montage, idriftsætning og opfølgning

Komplette løsninger

Løsninger fra System Standex er baseret på et omfattende program af alu-profiler og et tilbehørsprogram, der tilgodeser de fleste opgaver. Hvor der stilles særlige krav, engagerer vi os gerne i individuelle løsninger.

Vi leverer komplette løsninger til mangeartede opgaver i produktionen.

- Maskinafskærmninger
- Rulle vogne
- Kabinetter
- Fabriksinventar

Læs om systemerne her i kataloget. Kontakt vores konsulenter og få en snak om mulige løsninger i din virksomhed.

Maskinafskærmninger

Sikkert og funktionelt

Sikkerhedskrav

Hos System Standex engagerer vi os i at opfylde de sikkerhedskrav, der stilles i den aktuelle branche og virksomhed. Det kan være lovmæssige krav, foreskrifter efter Maskindirektivet eller specielle krav i den enkelte virksomhed. Vi konstruerer maskinafskærmninger til at sikre mod f.eks. bevægelige maskindele, udslyngning af maskindele eller materialer, røg, gas, støj, vibrationer, elektricitet, varme, kulde, stråling eller brand og eksplosioner.

Funktionalitet

Samtidig med opfyldelse af sikkerhedskravene udvikler vi konstruktionerne så der opnås de mest funktionelle betingelser for logistik i produktionen samt betjening og tilsyn med produktionsudstyret.

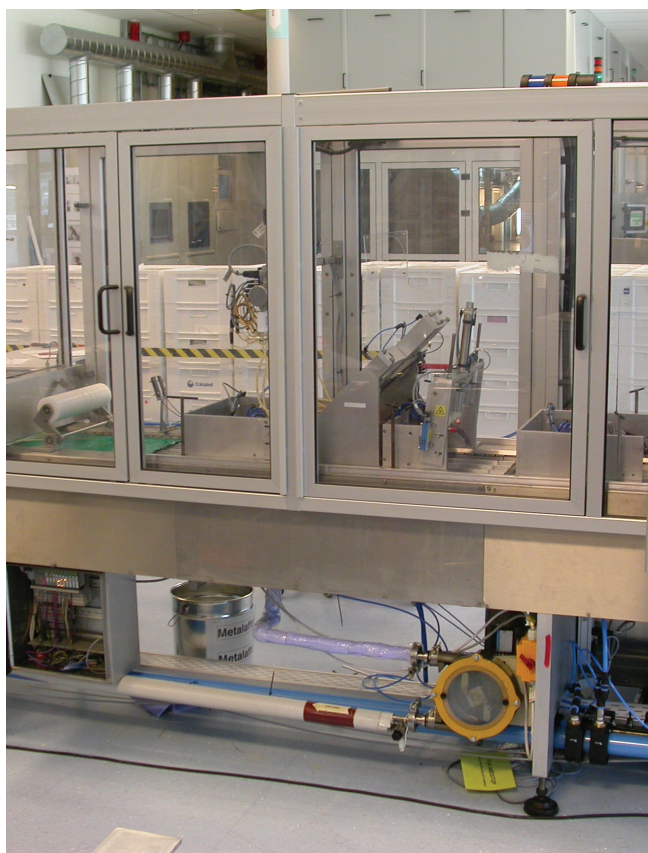

Fleksibilitet

Vores konstruktionsprofiler med synlige montage-spor giver fuldstændig fleksibilitet. Profilprogrammet er omfattende hvad angår dimensioner, styrke og former. Der findes tilbehør til alle lågetyper og andre detaljer. Alle profiler kan kombineres og samling kan ske i alle vinkler.

Lukkede profiler

Hygiejne og finish

Renrum

Programmet af lukkede profiler fra System Standex er skabt til opbygning af maskinafskærmninger og fabriksinventar, hvor der stilles store hygiejnekrav eller der ønskes en særlig finish.

De lukkede profiler er helt glatte, og hjørnerne er afrundet med en radius på 3,5 mm. Konstruktionerne er rengøringsvenlige, f.eks. til renrum i medicinalindustrien, elektronikindustrien og fødevareindustrien – dog ikke i våde miljøer.

Stor styrke

Profilerne har stor styrke med dimensioner op til 80 x 80 mm. Hvor der stilles ekstra styrkekrav, f.eks. til understel, maskinfundamenter og bærende dele, kan flere profiler kobles sammen. Der opnås stor designfrihed med hjørneprofiler i 30, 45, 60 og 90 graders vinkel.

Montagespor

Afdækningen over montagesporet er let at fjerne – enten i hele profilet's længde f.eks. ved isætning af plader eller punktvis ved profilsamlinger. Connector-samlinger kan udføres "skjulte", så skruer eller udfræsninger kun er synlige på bagsiden af konstruktionen.

Specialløsninger

Rullevogne, kabinetter og fabriksinventar

Samlet fabrikslayout

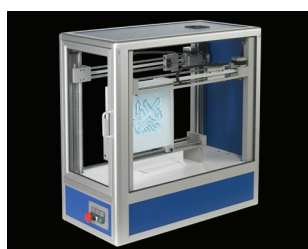

Konstruktionssystemerne fra System Standex er så fleksible, at de kan bruges til næsten alle former for fabriksindretning. Derved skabes robuste og praktiske konstruktioner, som passer i et samlet fabrikslayout. Konstruktionerne er også egnet til alle former for afskærmning og rumopdeling. F.eks. sikkerheds-afskærmninger, støjafskærmninger eller etablering af afskærmede miljøer til pauser eller til administrative arbejdspladser.

Opbygning af arbejdspladser

Ved indretning af arbejdspladser opfylder vi krav om fysisk arbejdsmiljø med hensyn til arbejdsstillinger, godt materialeflow og plads til installationer som el, trykluft og udsugning. Indretningen kan omfatte f.eks. arbejdsborde, reoler, rulleborde eller specielle konstruktioner, der fremmer arbejdsmiljø og produktivitet.

Kabinetter

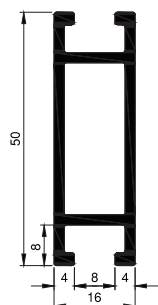

Vi har stor erfaring med at opbygge kabinetter til f.eks. instrumenter og elektronik. Vi tilbyder løsninger, der beskytter udstyret i belastende produktionsmiljøer. Udstyret kan bygges ind i permanente arbejdspladser eller gøres mobilt til brug på f.eks. hospitaler og laboratorier.

Lågelukker til nøgle

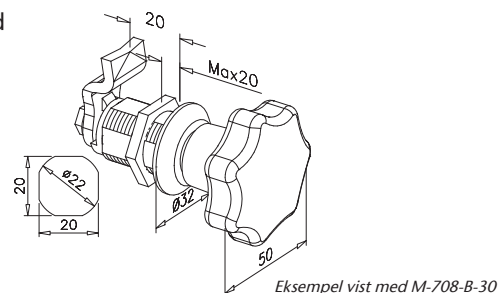

M-708-B-30 (op til 20mm profil/plade)

M-708-B-35 (op til 25mm profil/plade)

M-708-B-40 (op til 30mm profil/plade)

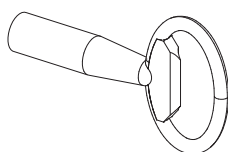

M-708-B-50 (op til 40mm profil/plade)

Lågelukker med
stjernegreb

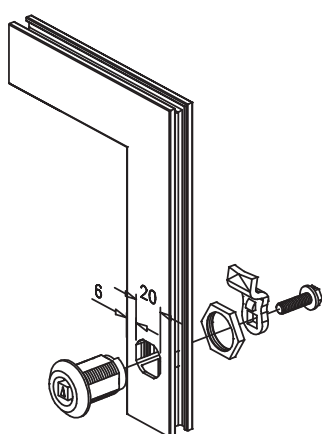

M-708-N

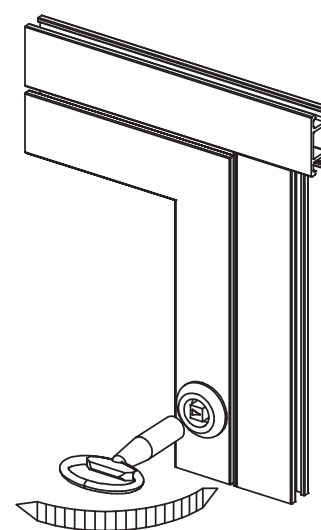

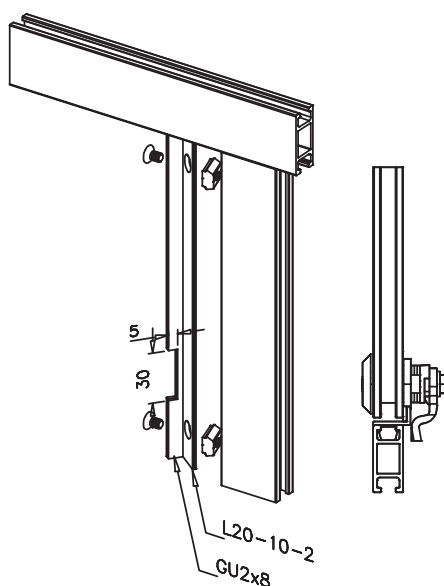

Nøgle

Montering af lågelukker

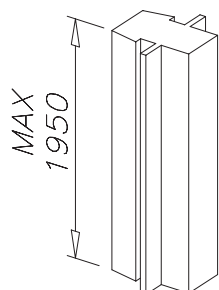

Eksempel vist med M-RC36-5 profil

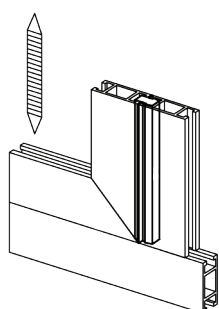

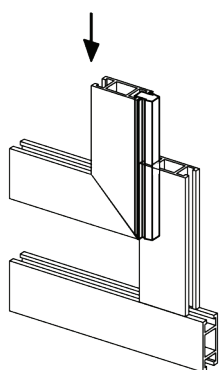

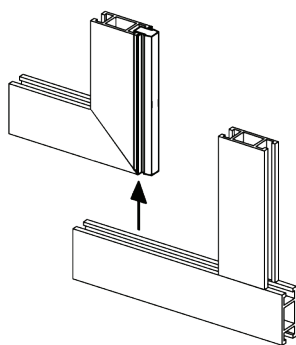

Hejselåger

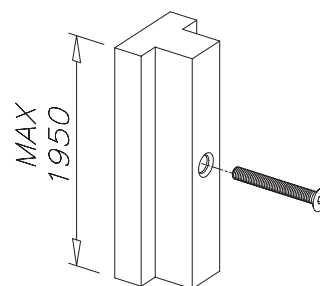

M-714-P
Nylonprofil

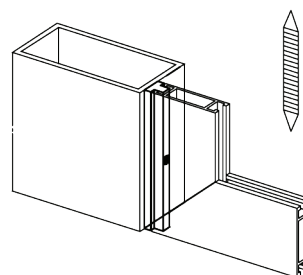

Montering af M-714-P

M-714-T
Nylonstyr

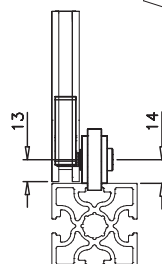

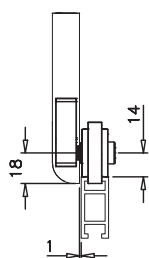

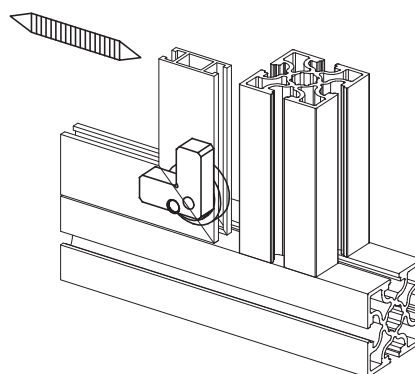

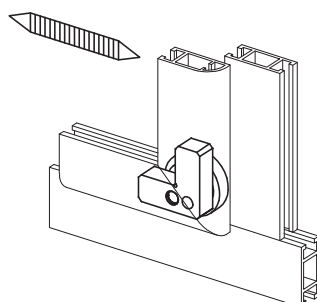

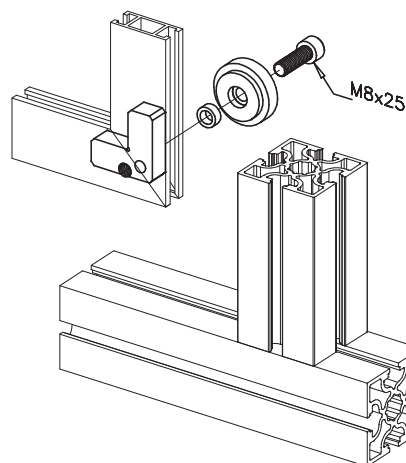

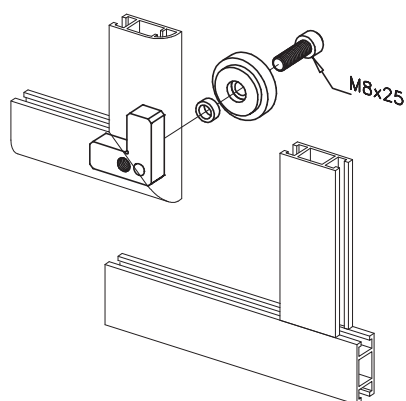

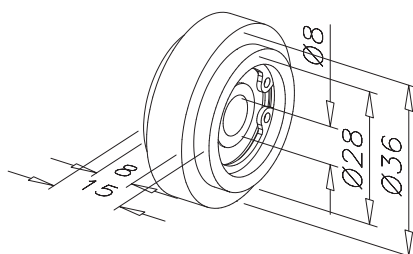

Montering af M-714-T

Skydelåger

M-723

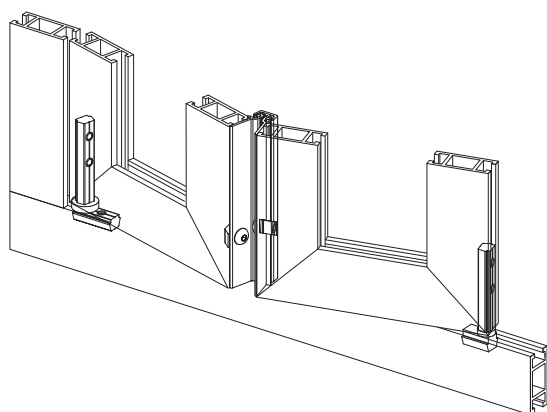

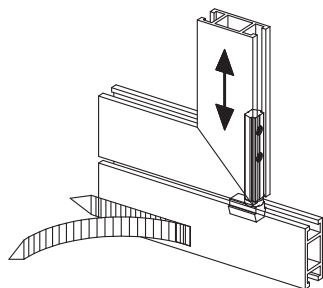

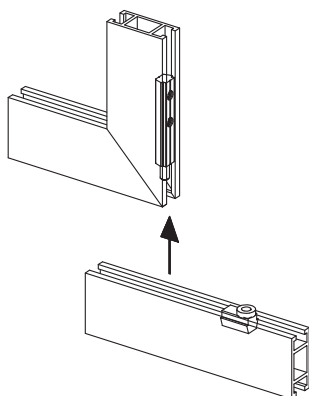

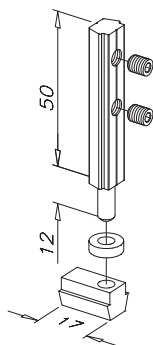

Hvid nylonrulle med kugleleje til skydelåger. Incl. skrue.

Knæklåger

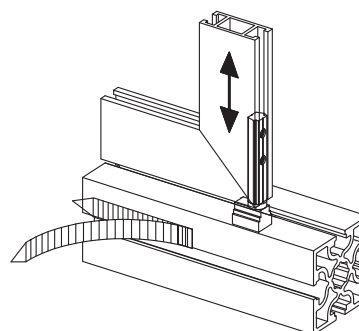

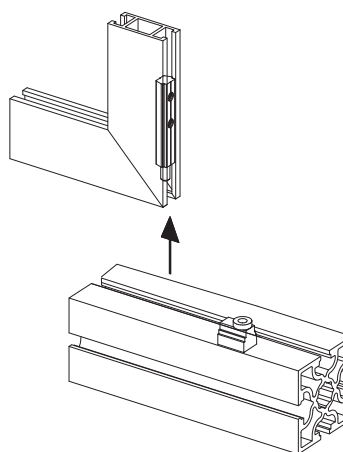

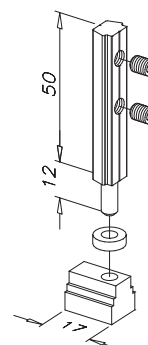

M-703-12

Anvendes til smigsamlede låger i stel af M-RC36 og M-RC44 profiler

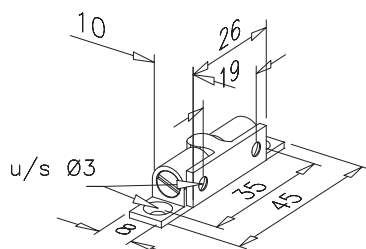

M-I50-18-12

Anvendes til smigsamlede låger i stel af M-RC50-4 profil

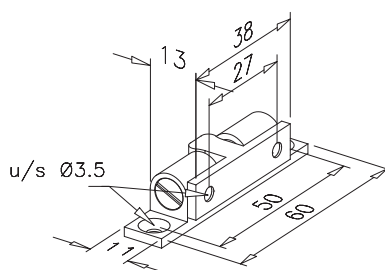

Magnet- og kuglelukker

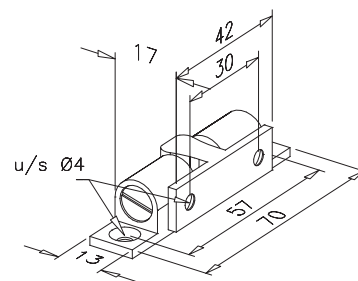

M-709 45 mm
Kuglelukker

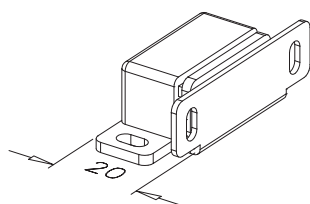

M-709 60 mm
Kuglelukker

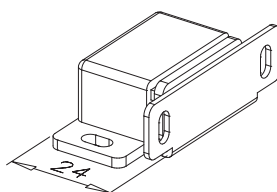

M-709 70 mm
Kuglelukker

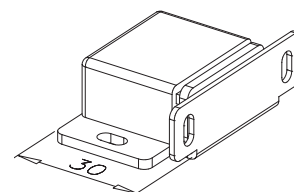

M-707 4 kg
Magnetlukker

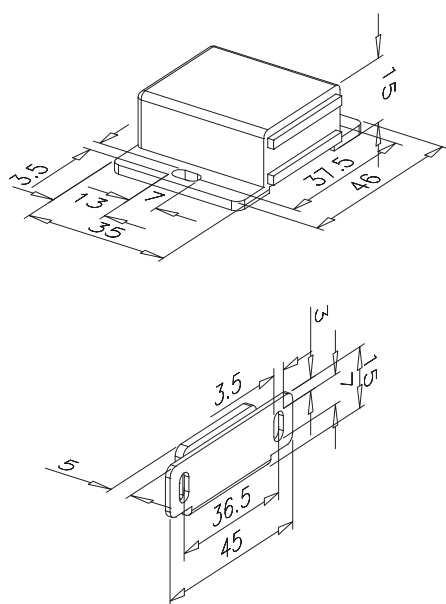

M-707 6 kg
Magnetlukker

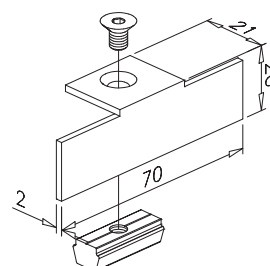

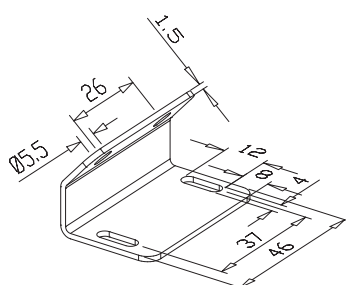

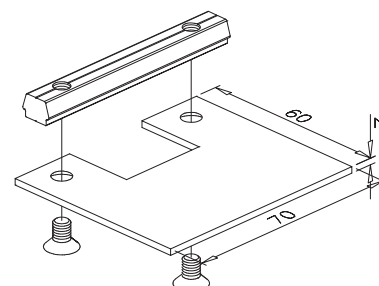

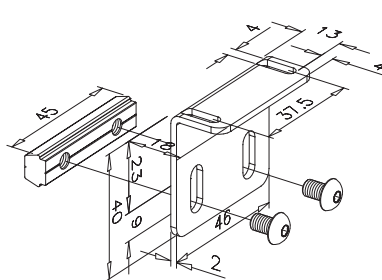

M-707 8 kg
Magnetlukker

M-707 11 kg
Magnetlukker

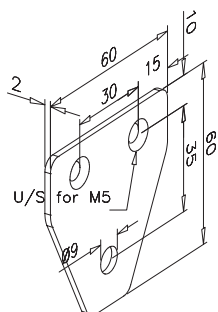

Eksempler for montage af magnet- og kuglelukker findes i stål og alu-beslag, efter opgave.

Lågeautomatik

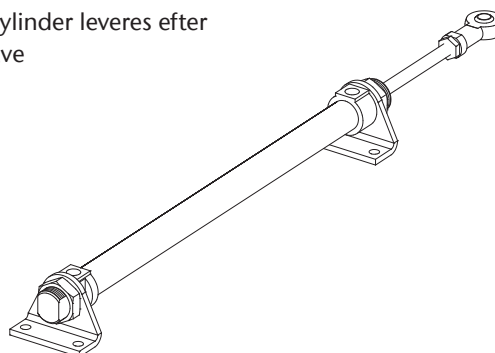

M-719

Montagebeslag for gasfjeder excl. skruer og møtrikker

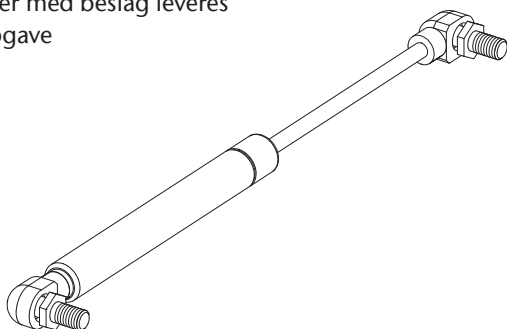

M-800

Luftcylinder leveres efter opgave

M-722

Gasfjeder med beslag leveres efter opgave

Value for money

System Standex er en veletableret virksomhed med mange års erfaring i udvikling, produktion og udførelse af kundetilpassede løsninger baseret på konstruktionssystemer af aluminium. Vores løsninger er baseret på systemer i eget design, der kombineres og opbygges med specialudviklede samlemetoder. Det giver stor fleksibilitet til individuelle løsninger.

Vi har egen konstruktionsafdeling og produktion. Vores konsulenter yder rådgivning og projektledelse hele vejen gennem ethvert projektforsløb. System Standex er førende i Danmark inden for vores produktområder, og vi har en betydelig eksport til det meste af verden.

Vi lægger stor vægt på nytænkning og produktudvikling. Et af de nyeste eksempler, er nye flot designede løsninger til maskinafskærmninger med lukkede profiler, der giver en enestående finish og tilgodeser høje hygiejnekrav.

Vores maskinafskærmninger produceres både til eksisterende produktionsanlæg og til nye maskiner, hvor afskærmningerne indgår som en integreret del af fabrikslayoutet.

Kontakt os for en uforpligtende snak om mulighederne med maskinafskærmninger og fabriksindretning fra System Standex.
