55 FRAME

Exhibition system in modular matrix frames

55 FRAME

Exhibition & display system offering many options

The new 55 Frame system is built without the need for tools. You can design and build a variety of exhibition stands and POS displays using a range of modular interchangeable frames.

The frames are designed to take either fabric or mounted panels.

Easy to build frames
 - No tools required.

Colours
Frames can be powder coated to the RAL range of colours.

• Modular and interchangeable

• Strong and robust construction

• To take fabric and panel mounted graphics

• Assembly with joints

• Frames can be disassembled for transport or storage

• Frames are manufactured from satin anodised aluminium

• The standard module is 992 x 992mm. All manufactured to order so other sizes are not an issue.

55 FRAME

Fabric print or panels

Panels with velcro

Velcro strip is mounted to the inner groove of the frame and to the back of the panel.

The panel is fitted by pressing it against the velcro strips on the frame.

Fabric banner with pvc

A PVC profile is sewn directly onto the fabric banner.

To mount the banner, simply press the profile into the track that run along the frame.
